

Changing your Emoticon

 When you write a Post, you can change your Emoticon to match how you feel about that comment.

 Just click on the mini-Avatar next to the Post box and several will appear on the screen.

 Click on the one you want

 Then Post your comment. Your Emoticon will then be displayed beside the relevant comment, and on your Avatar.

 Your Avatar reverts back to the default Emoticon for the next post, unless you change it again.
