

The Green Room & your Avatar

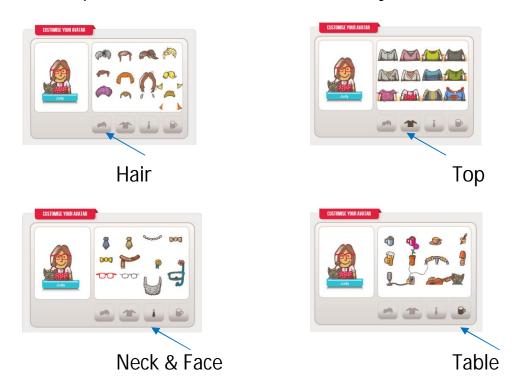

The Green Room is the first screen you enter after logging in. It is where you get information about the session, such as when it starts and ends, and other relevent information shared by the Facilitator.

If it's your first visit to InsiderFocus, or you haven't been here for a while, have a look at the short Overview video, that will help you get the most enjoyment out of the Chat Room activities.

It's also where you can customise your Avatar. You have several options, so click/tap on the various sections to make your choice.

- You can change your look each time you enter the Chat Room, or leave it the same.
- Once you're happy with your look, click/tap on the Enter Chat Room button.
